Aitken, T. R., M. H. Fisher, and J. A. Anderson. Effect of protein content and grade on farinograms, extensograms, and alveograms..... 465
——, —— **and** —— Reproducibility studies and some effects of technique on extensograms and alveograms..... 489
—— (See B. N. Smallman)..... 499
Alcock, A. W. (See A. Hoffer) 210, 515, 524
Anderson, G. (See R. B. Meckel)..... 280
Anderson, J. A., K. W. Neatby, and I. Levi. A preharvest survey of the protein content of western Canadian wheat of the 1943 crop..... 283
—— (See T. R. Aitken)..... 465, 489
—— (See W. J. Eva)..... 560
—— (See W. O. S. Meredith)..... 233
Andrews, A. C. (See C. O. Swanson)... 140
Andrews, J. S. Book review: The chemistry and technology of food and food products, ed. by M. B. Jacobs..... 577
—— Report of the 1943–44 methods of analysis subcommittee on riboflavin assay..... 398
—— Report of the 1943–44 methods of analysis subcommittee on thiamine assay..... 388
Anker, C. A., and W. F. Geddes. Gelatinization studies upon wheat and other starches with the amylograph... 335
Ausemus, E. R. (See P. P. Merritt).... 199

Bailey, C. H. Book review: Physical properties of dough, by C. O. Swanson 79
Baker, J. C., H. K. Parker, and M. D. Mize. The action of oxidizing agents on sulfhydryl compounds in dough... 97
Balls, A. K., and T. H. Harris. The inhibitory effect of a protamine from wheat flour on the fermentation of wheat mashes..... 74
Barmore, M. A. (See K. F. Finney).... 65
Bauernfeind, J. C., M. B. Smith, J. C. Garey, Werner Baumgarten, F. H. Gustoff, and Leonard Stone. Nutrient content of alcohol fermentation by-products from various grains..... 421
Baumgarten, Werner. (See J. C. Bauernfeind)..... 421
Bayfield, E. G. (See H. D. Young)..... 149
Blish, M. J. Book review: The constituents of wheat and wheat products, by C. H. Bailey..... 334
Bode, C. E. (See V. H. Morris)..... 49
Borchardt, L. F. Book review: Micromeritics, by J. M. DallaValle..... 579
Brown, R. O., and C. G. Harrel. The use of the amylograph in the cereal laboratory..... 360

Carlin, G. T. A microscopic study of the behavior of fats in cake batters.... 189
Cathcart, W. H., and E. C. Edelmann. A note on the comparative efficiency of *l*-ascorbic acid and potassium bromate as dough conditioners..... 575
—— (See E. C. Edelmann)..... 385
Combs, Y. F. An instrument for determining the compressibility and resistance to shear of baked products..... 319
Cox, M. J., M. M. MacMasters, and G. E. Hilbert. Effect of the sulfurous acid steep in corn wet milling..... 447

Davis, C. F. (See Stephen Laufer).... 267
Davis, H. A. (See R. J. Dimler)..... 430
Dickson, A. D. (See W. J. Olson)..... 533
Dimler, R. J., H. A. Davis, C. E. Rist, and G. E. Hilbert. Production of starch from wheat and other cereal flours..... 430

Earle, F. R., and R. T. Milner. Improvements in the determination of starch in corn and wheat..... 567
Edelmann, E. C., and W. H. Cathcart. The measurement of oven spring as an aid in controlling flour quality..... 385
—— (See W. H. Cathcart)..... 575
Elion, E. Correlation between chemical structure of some organic compounds and their action as flour improvers and as inhibitors of proteolytic enzymes... 314
Elledge, Muriel. (See R. H. Harris).... 38
Eva, W. J., and J. A. Anderson. The relations between Kjeldahl protein, Zeleny protein, and loaf volume in western Canadian wheats and flours.. 560
—— (See W. O. S. Meredith)..... 233
Evans, J. W. Book review: Chemistry and industry of starch, ed. by R. W. Kerr..... 578
Evans, Ruth. (See W. J. Olson)..... 533

Fieger, E. A. (See V. R. Williams)..... 540
Finney, K. F., and M. A. Barmore. Flour blends and the question of complementary effects..... 65
Fisher, M. H. (See T. R. Aitken). 465, 489
Fortmann, Karl. (See R. M. Sandstedt) 172
Freilich, J., and C. N. Frey. Dough oxidation and mixing studies. VI. Effects on oxidizing agents in the presence of reducing matter..... 241
Frey, C. N. (See J. Freilich)..... 241

Garey, J. C. (See J. C. Bauernfeind)... 421
Geddes, W. F. Book review: Cellulose and cellulose derivatives, ed. by Emil Ott..... 333
—— (See C. A. Anker)..... 335
—— (See A. Hoffer)..... 210, 515, 524
Glick, David. Simplified procedures for the determination of thiamine in wheat flours and bread by the thiochrome method..... 119
Gortner, R. A., and R. T. MacDonald. Studies on the fractionation of zein... 324
Goulden, C. H. Experimental design for cereal chemists..... 159
Gustoff, F. H. (See J. C. Bauernfeind). 421

Hanks, William. (See E. A. Vaupel).. 16
Harrel, C. G. (See R. O. Brown)..... 360

Hildebrand, F. C., and R. C. Koehn. Sources of error in the determination of the protein content of bulk wheat .. 370
Hlynka, K. (See W. O. S. Meredith) ... 251
Hoffer, A., A. W. Alcock, and W. F. Geddes. The effect of variations in Canadian spring wheat on the thiamine and ash of long extraction flours. 210
——, —— **and** —— A rapid method for the determination of riboflavin in wheat and wheat products 524
——, —— **and** —— Some factors affecting the determination of riboflavin by the fluorometric method 515
Hove, E. L. (See Howard Lincoln) 274
Howe, M. Report of the 1943–44 methods of analysis subcommittee on the determination of iron in cereal products 412

Johnson, J. A. (See C. O. Swanson) ... 222

Kik, M. C., and F. B. Van Landingham. Nicotinic acid in products of commercial rice milling and in rice varieties .. 154
Kneen, Eric. A comparative study of the development of amylases in germinating cereals 304
Koehn, R. C. (See F. C. Hildebrand) .. 370
Kretovich, V. L. Biochemistry of the damage to grain by the wheat-bug 1

Lamb, C. A. Sifted wheat meal mixograms for selecting soft wheat varieties 57
Laufer, Stephen, Henry Tauber, and C. F. Davis. The amylolytic and proteolytic activity of soybean seed 267
Levi, I. (See J. A. Anderson) 283
Lincoln, Howard, E. L. Hove, and C. G. Harrel. The loss of thiamine on cooking breakfast cereals 274
Loving, H. J. (See F. R. Schwain) 27
Lyman, J. F. (See M. R. Shetlar) 295

MacDonald, R. T. (See R. A. Gortner) 324
McKim, Elizabeth. Report of the 1943–44 committee on self-rising and phosphated flours 419
MacMasters, M. M., and G. E. Hilbert. The composition of the "amylodextrin" fraction of wheat flour 548
—— **and** —— Stored and damaged wheats for starch production 258
—— (See M. J. Cox) 447
Meckel, R. B., and G. Anderson. Thiamine retention in the commercial production of zwieback 280
Meredith, W. O. S., W. J. Eva, and J. A. Anderson. Effect of variety and environment on some qualities of malted wheat flour 233
——, **K. Hlynka, and H. R. Sallans.** Laboratory malting. IV. Germination chamber for routine malting tests 251
Merritt, P. P., and E. R. Ausemus. Effect of scab on the quality of hard red spring wheat 199
Milner, R. T. (See F. R. Earle) 567
Mize, M. D. (See J. C. Baker) 97
Morris, V. H., C. E. Bode, and H. K. Heizer. The use of the mixogram in evaluating quality in soft wheat varieties 49
Myers, H. S., and E. B. Working. The sulfhydryl groups of wheat flour 32

Neatby, K. W. (See J. A. Anderson) .. 283

Olson, W. J., Ruth Evans, and A. D. Dickson. A modification of the Kneen and Sandstedt methods for the determination of alpha- and beta-amylases in barley malt 533

Parker, H. K. (See J. C. Baker) 97
Pratt, D. B. Report of the 1943–44 committee on relation of laboratory baking to shop practice 556

Rist, C. E. (See R. J. Dimler) 430

Sallans, H. R. (See W. O. S. Meredith) 251
Sandstedt, R. M., and Karl Fortmann. Effect of environment during the growth and development of wheat on the baking properties of its flour 172
Schiller, G. W. Simplification of the thiochrome method for thiamine determination 544
Schwain, F. R. Report of the 1943–44 committee on testing biscuit and cracker flours 407
—— **and H. J. Loving.** The shortener tolerance of biscuit and self-rising flours 27
Scott, G. M. (See R. H. Harris) 374
Shetlar, M. R., and J. F. Lyman. Effect of bran on bread baking 295
Sibbitt, L. D. (See R. H. Harris) ... 38, 374
Smallman, B. N., and T. R. Aitken. Susceptibility of biscuits to insect damage 499
Smith, M. B. (See J. C. Bauernfeind) .. 421
Stern, Rosa. Effects on flour doughs of extracts from unfermented and fermented wheat germ 81
—— A note on the presence of fiber in the "amylodextrin" fraction of wheat flour 369
Stone, Leonard. (See J. C. Bauernfeind) 421
Swanson, C. O. Factors that influence the physical and other properties of wheat. V. Effect of frequent rains accompanied by storms on Blackhull, Chiefkan, and Tenmarq 126

—— **and A. C. Andrews.** Factors which influence the physical properties of dough. VI. Effect of cysteine and some other substances on mixogram patterns 140
—— **and J. A. Johnson.** The effect of some wetting and reducing agents on the mixing time and on the quality of bread 222

Tauber, Henry. (See Stephen Laufer) . 267
Tremain, H. E. The relative germicidal effectiveness of certain chlorine compounds on the thermoduric bacterial spores of wheat 511

Van Landingham, F. B. (See M. C. Kik) 154
Vaupel, E. A., and William Hanks. pH variations in soda crackers and their control with diammonium phosphate . 16

Williams, V. R., and E. A. Fieger. A study of some of the vitamin B-complex factors in rice and its milled products, II 540
Working, E. B. (See H. S. Myers) 32
Worzella, W. W. The effect of level of soil fertility on wheat quality 107

Young, H. D., and E. G. Bayfield. Effect of hydrocyanic acid on the baking quality of flour 149

SUBJECTS

Aerosol, Effect on dough (Swanson and Andrews) 140
Alcohol fermentation, Nutrient content of by-products (Bauernfeind, Smith, Garey, Baumgarten, Gustoff, and Stone) 421
Alpha amylase, see Amylases
Alveograms
Effect of protein content and grade on (Aitken, Fisher, and Anderson) 465
Reproducibility and effects of technique on (Aitken, Fisher, and Anderson) 489
Amylases
Cereal, development in germinating (Kneen) 304
Malt, modification of Kneen and Sandstedt method for (Olson, Evans, and Dickson) 533
Soybean, activity (Laufer, Tauber, and Davis) 267
Amylodextrin
Composition in flour (MacMasters and Hilbert) 548
Fiber in wheat flour fraction (Stern) .. 369
Amylograph
Use in cereal investigations (Brown and Harrel) 360
Use in wheat starch gelatinization studies (Anker and Geddes) 335
Analysis, Relation to experimental design (Goulden) 159
Ascorbic acid, *l*, Efficiency as dough conditioner (Cathcart and Edelmann) . 575
Ash, Relation to thiamine content of flour (Hoffer, Alcock, and Geddes) . 210

Bacteria, Sporulating thermoduric, effect of chlorine compounds on in wheat (Tremain) 511
Baked products, Instrument to measure compressibility and resistance to shear (Combs) 319
Baking
Effect of bran in bread (Shetlar and Lyman) 295
Tests, correlation with shop practice (Pratt) 556
Thiamine loss in zwieback (Meckel and Anderson) 280
Barley malt, see Malt
Beta amylase, see Amylases
Biotin, In rice varieties and milling products (Williams and Fieger) 540
Biscuit flour
Shortening tolerance (Schwain and Loving) 27
Testing (Schwain) 407
Biscuits, Susceptibility to insect damage (Smallman and Aitken) 499
Book reviews
Cellulose and cellulose derivatives, ed. by Emil Ott (Geddes) 333
Chemistry and industry of starch, ed. by R. W. Kerr (Evans) 578
The chemistry and technology of food and food products, ed. by M. B. Jacobs (Andrews) 577
The constituents of wheat and wheat products, by C. H. Bailey (Blish) .. 334
Micromeritics, by J. M. DallaValle (Borchardt) 579
Physical properties of dough, by C. O. Swanson (Bailey) 79
Bran, Effect on bread baking (Shetlar and Lyman) 295
Bread
Color, effect of flour blending (Finney and Barmore) 65
Effect of bran in baking (Shetlar and Lyman) 295
Improvers, efficiency of *l*-ascorbic acid and potassium bromate (Cathcart and Edelmann) 575
Iron in, determination (Howe) 412
Loaf volume, see Loaf volume
Quality, effect of wetting and reducing agents (Swanson and Johnson) 222
Riboflavin in, by fluorometric assay (Andrews) 398
Thiamine in, by thiochrome assay (Andrews) 388
— (Glick) 119
Breakfast cereals, see Cereals, Breakfast

Cake batter, Microscopic study of fats in (Carlin) 189
Cereal amylases, see Amylases, Cereal
Cereal chemists, Experimental design for (Goulden) 159

Cereal starch, see Starch, Cereal
Cereals
Breakfast, thiamine loss on cooking (Lincoln, Hove, and Harrel) 274
Germinating, amylase development in (Kneen) 304
Cereals and cereal products
Amylograph in testing (Brown and Harrel) 360
Iron determination in (Howe) 412
Thiamine assay simplification (Schiller) 544
Chloramine, Germicidal action on thermoduric bacterial spores of wheat (Tremain) 511
Chlorine compounds, Germicidal action on thermoduric bacterial spores of wheat (Tremain) 511
Collaborative studies
Biscuit and cracker flour testing (Schwain) 407
Iron in cereal products (Howe) 412
Relation of laboratory baking to shop practice (Pratt) 556
Riboflavin assays (Andrews) 398
Thiamine assays (Andrews) 388
Committee reports
Committee on relation of laboratory baking to shop practice, 1943–44 (Pratt) 556
Committee on self-rising and phosphated flours, 1943–44 (McKim) ... 419
Committee on testing biscuit and cracker flours, 1943–44 (Schwain) .. 407
Methods of analysis, subcommittee, 1943–44 (Andrews) 388, 398
— (Howe) 412
Compressibility of baked products, Instrument for determining (Combs) . 319
Cooking, Thiamine loss in breakfast cereals (Lincoln, Hove, and Harrel) 274
Cooky flour, Testing (Schwain) 407
Corn
Starch, see Starch, Corn
Wet milling, effect of sulfurous acid steep (Cox, MacMasters, and Hilbert) 447
Cracker flour, Testing (Schwain) 407
Crackers, pH variation and control (Vaupel and Hanks) 16
Cysteine, Effect on mixogram patterns (Swanson and Andrews) 140

Design, Experimental for cereal chemists (Goulden) 159
Diammonium phosphate, pH control in crackers with (Vaupel and Hanks) .. 16
Dough
Conditioners, efficiency of *l*-ascorbic acid and potassium bromate (Cathcart and Edelmann) 575
Effect of
extracts from fermented and unfermented wheat germ (Stern) 81
oxidizing agents in presence of reducing matter (Freilich and Frey) .. 241
oxidizing agents on sulfhydryl (Baker, Parker, and Mize) 97
temperature on mixograms (Harris, Sibbitt, and Scott) 374
Mixing, effect of method on mixograms (Harris, Sibbitt, and Elledge) 38
Dough (Continued):
Mixing time, effect of wetting and reducing agents (Swanson and Johnson) 222
Physical properties
correlation of tests with shop practice (Pratt) 556
effect of cysteine and other substances (Swanson and Andrews) .. 140
effect of protein content and grade (Aitken, Fisher, and Anderson) .. 465
reproducibility and effects of technique on measurements (Aitken, Fisher, and Anderson) 489

Experimental design for cereal chemists (Goulden) 159
Extensograms
Effect of protein content and grade on (Aitken, Fisher, and Anderson) 465
Reproducibility and effects of technique on (Aitken, Fisher, and Anderson) 489

Farinograms, Effect of protein content and grade on (Aitken, Fisher, and Anderson) 465
Fats, Microscopic study of in cake batter (Carlin) 189
Fermentation
By-products, nutrient content (Bauernfeind, Smith, Garey, Baumgarten, Gustoff, and Stone) 421
Effect of flour protamine (Balls and Harris) 74
Fertility of soil, Effect on wheat quality (Worzella) 107
Fiber, In amylodextrin fraction of flour (Stern) 369
Flour
Amylodextrin fraction
composition (MacMasters and Hilbert) 548
fiber in (Stern) 369
Ash in relation to thiamine content (Hoffer, Alcock, and Geddes) 210
Baking quality
effect of
flour blending (Finney and Barmore) 65
hydrocyanic acid (Young and Bayfield) 149
scab on wheat (Merritt and Ausemus) 199
wheat-bug damage (Kretovich) .. 1
wheat growth environment (Sandstedt and Fortmann) 172
oven spring in measuring (Edelmann and Cathcart) 385
Biscuit, see Biscuit flour
Blends as related to complementary effects (Finney and Barmore) 65
Canadian, relation of protein to loaf volume (Eva and Anderson) 560
Cooky, see Cooky flour
Cracker, see Cracker flour
Dough, see Dough
Hard red spring wheat, mixograms (Harris, Sibbitt, and Elledge) 38
Improvers, correlation between chemical structure, action, and enzyme inhibiting action (Elion) 314

Flour (Continued):
Iron in, determination (Howe) 412
Malted, effect of variety and environment on quality (Meredith, Eva, and Anderson) 233
Mixogram properties, effect of temperature (Harris, Sibbitt, and Scott) 374
Phosphated, testing (McKim) 419
Protamines, effect on wheat mash fermentation (Balls and Harris) 74
Protein in, effect on farinograms, extensograms, and alveograms (Aitken, Fisher, and Anderson) 465
Riboflavin in
by fluorometric assay (Andrews) ... 398
rapid fluorometric method (Hoffer, Alcock, and Geddes) 524
sources of error in fluorometric method (Hoffer, Alcock, and Geddes) 515
Self-rising
shortening tolerance (Schwain and Loving) 27
testing (McKim) 419
Soft wheat, mixograms (Morris, Bode, and Heizer) 49
Sulfhydryl groups (Myers and Working) 32
Thiamine in
effect of wheat variations (Hoffer, Alcock, and Geddes) 210
by thiochrome assay (Andrews) 388
— (Glick) 119
Viscosity studies with the amylograph (Brown and Harrel) 360
Fluorometric assay for riboflavin
In flour and bread (Andrews) 398
Rapid method (Hoffer, Alcock, and Geddes) 524
Sources of error in (Hoffer, Alcock, and Geddes) 515
Fractionation of zein (Gortner and MacDonald) 324
Fumigants, Effect on flour baking quality (Young and Bayfield) 149

Gas retention in dough, Oven spring in measuring (Edelmann and Cathcart) 385
Gelatinization of wheat starch (Anker and Geddes) 335
Germination
Chamber for routine malting tests (Meredith, Hlynka, and Sallans) ... 251
Effect on amylase development in cereals (Kneen) 304
Glutathione, Effect of oxidizing agents on in dough (Freilich and Frey) ... 241
Grain fermentation by-products, Nutrient content (Bauernfeind, Smith, Garey, Baumgarten, Gustoff, and Stone) 421

Hydrocyanic acid, Effect on flour baking quality (Young and Bayfield) 149
Hydrogen ion concentration, Variation and control in crackers (Vaupel and Hanks) 16

Insects, Damage to biscuits (Smallman and Aitken) 499
Iron, In cereal products, determination (Howe) 412

Kjeldahl protein determination, Relation to Zeleny method and loaf volume (Eva and Anderson) 560
Kneen and Sandstedt method for amylases in barley malt, modification of (Olson, Evans, and Dickson) 533

Loaf volume
Effect of flour blending (Finney and Barmore) 65
Relation to Kjeldahl and Zeleny protein determination (Eva and Anderson) 560

Malt
Amylases, see Amylases, Malt
Modification of Kneen and Sandstedt method for amylases in (Olson, Evans, and Dickson) 533
Malted flour, see Flour, Malted
Malting, Germination chamber for routine tests (Meredith, Hlynka, and Sallans) 251
Milling, Corn, effect of sulfurous acid in wet (Cox, MacMasters, and Hilbert) 447
Mixing of dough, see Dough, Mixing
Mixograms
Effect of
cysteine and other substances (Swanson and Andrews) 140
temperature (Harris, Sibbitt, and Scott) 374
variety, station, and season (Harris, Sibbitt, and Elledge) 38
Hard red spring wheat flour (Harris, Sibbitt, and Elledge) 38
— (Harris, Sibbitt, and Scott) 374
Sifted soft wheat meal (Lamb) 57
Soft wheat varieties (Morris, Bode, and Heizer) 49

Nicotinic acid, In rice varieties and milling products (Kik and Van Landingham) 154
Nutritive value, Fermentation by-products (Bauernfeind, Smith, Garey, Baumgarten, Gustoff, and Stone) .. 421

Oven spring, Measurement in flour quality control (Edelmann and Cathcart) 385
Oxidizing agents
Effect on
dough in presence of reducing matter (Freilich and Frey) 241
sulfhydryl in dough (Baker, Parker, and Mize) 97

Papain, Inhibition by flour improvers (Elion) 314
pH, see Hydrogen ion concentration
Phosphated flour, see Flour, Phosphated
Polarimetric method for starch determination (Earle and Milner) 567
Potassium bromate, Efficiency as dough conditioner (Cathcart and Edelmann) 575
Potato starch, see Starch, Potato
Protamines, Effect on wheat mash fermentation (Balls and Harris) 74
Proteases
Inhibition by flour improvers (Elion) . 314
Soybean, activity (Laufer, Tauber, and Davis) 267

Protein
Corn, separation from starch in wet milling (Cox, MacMasters, and Hilbert) ... 447
Fractions in zein (Gortner and MacDonald) ... 324
Separation from starch in starch production (Dimler, Davis, Rist, and Hilbert) ... 430
Wheat
effect on farinograms, extensograms, and alveograms (Aitken, Fisher, and Anderson) ... 465
effect of wheat-bug damage (Kretovich) ... 1
errors in determination (Hildebrand and Koehn) ... 370
1943 western Canadian (Anderson, Neatby, and Levi) ... 283
preharvest prediction correlation (Anderson, Neatby, and Levi) ... 283
relation of Kjeldahl and Zeleny determination to loaf volume (Eva and Anderson) ... 560
sulfhydryl groups in (Myers and Working) ... 32
Proteolytic enzymes, see Proteases

Rain, Effect on wheat quality (Swanson) 126
Reducing agents, Effect on mixing time and bread quality (Swanson and Johnson) ... 222
Reducing matter, Effect of oxidizing agents on dough in presence of (Freilich and Frey) ... 241
Riboflavin
Assays
fluorometric method (Andrews) ... 398
rapid fluorometric method (Hoffer, Alcock, and Geddes) ... 524
sources of error in fluorometric method (Hoffer, Alcock, and Geddes) ... 515
In flour and bread, fluorometric assay (Andrews) ... 398
In rice varieties and milling products (Williams and Fieger) ... 540
Rice
Nicotinic acid in varieties and milling products (Kik and Van Landingham) ... 154
Riboflavin and biotin in varieties and milling products (Williams and Fieger) ... 540
Rye meal, Amylograph in testing (Brown and Harrel) ... 360

Scab, Effect on wheat quality (Merritt and Ausemus) ... 199
Self-rising flour, see Flour, Self-rising
Shear, Resistance to in baked products, instrument for determining (Combs) 319
Shortening tolerance, Biscuit and self-rising flours (Schwain and Loving) 27
Soda crackers, see Crackers
Sodium chloride, Effect on dough (Swanson and Andrews) ... 140
Sodium hypochlorite, Germicidal action on thermoduric bacterial spores of wheat (Tremain) ... 511
Soil fertility, Effect on wheat quality (Worzella) ... 107

Soybean
Amylases, see Amylases, Soybean
Amylograph in testing products of (Brown and Harrel) ... 360
Germinated, enzymes in (Laufer, Tauber, and Davis) ... 267
Proteases, see Proteases, Soybean
Spores, Thermoduric bacterial, effect of chlorine compounds on in wheat (Tremain) ... 511
Starch
Cereal, production from flours (Dimler, Davis, Rist, and Hilbert) ... 430
Corn
gelatinization (Anker and Geddes) 335
improvement in determination (Earle and Milner) ... 567
separation from protein in wet milling (Cox, MacMasters, and Hilbert) ... 447
Polarimetric method for determination (Earle and Milner) ... 567
Potato, gelatinization (Anker and Geddes) ... 335
Production from
stored and damaged wheat (MacMasters and Hilbert) ... 258
wheat and other cereal flours (Dimler, Davis, Rist, and Hilbert) ... 430
Wheat
composition of amylodextrin (MacMasters and Hilbert) ... 548
fiber in amylodextrin fraction (Stern) 369
gelatinization (Anker and Geddes) 335
improvement in determination (Earle and Milner) ... 567
production from flour (Dimler, Davis, Rist, and Hilbert) ... 430
production from stored and damaged wheat (MacMasters and Hilbert) 258
Statistics, Analysis and experimental design in (Goulden) ... 159
Sulfhydryl
Effect of
added on dough (Swanson and Andrews) ... 140
oxidizing agents in dough (Baker, Parker, and Mize) ... 97
wheat germ fermentation on (Stern) 81
In flour (Myers and Working) ... 32
In wheat germ extracts, effect on dough (Stern) ... 81
Sulfurous acid steep, Effect in corn wet milling (Cox, MacMasters, and Hilbert) ... 447

Thiamine
Assays
simplification of the thiochrome method (Schiller) ... 544
thiochrome method (Andrews) ... 388
In breakfast cereals, loss on cooking (Lincoln, Hove, and Harrel) ... 274
In flour, effect of wheat variations (Hoffer, Alcock, and Geddes) ... 210
In flour and bread, thiochrome assay (Andrews) ... 388
— (Glick) ... 119
In zwieback, loss during production (Meckel and Anderson) ... 280
Thiochrome assay for thiamine
In flour and bread (Andrews) ... 388
— (Glick) ... 119

Thiochrome assay (Continued):
Simplification (Schiller) 544
Toasting, Thiamine loss in zwieback (Meckel and Anderson) 280

Viscosity, Studies with the amylograph (Brown and Harrel) 360
Vitamin B_1, see Thiamine
Vitamin B_2, see Riboflavin

Wetting agents
Effect on
dough (Swanson and Andrews) 140
mixing time and bread quality (Swanson and Johnson) 222
Wheat
Bug, damage to grain by (Kretovich) . 1
Canadian, relation of protein to loaf volume (Eva and Anderson) 560
Damaged for starch production (MacMasters and Hilbert) 258
Effect of
chlorine compounds on thermoduric bacterial spores in (Tremain) 511
frequent rains and storms on properties (Swanson) 126
growth environment on flour quality (Sandstedt and Fortmann) 172
Flour, see Flour
Germ, effect of extracts on flour dough (Stern) 81
Hard
effect of
growth environment on quality (Sandstedt and Fortmann) 172
scab on (Merritt and Ausemus) .. 199
temperature on mixograms (Harris, Sibbitt, and Scott) 374
variations on thiamine and ash (Hoffer, Alcock, and Geddes) .. 210
varieties on mixograms (Harris, Sibbitt, and Elledge) 38

Wheat (Continued):
Mash, fermentation, effect of protamine (Balls and Harris) 74
Meal, mixograms (Lamb) 57
Protein content
effect on farinograms, extensograms, and alveograms (Aitken, Fisher, and Anderson) 465
errors in determination (Hildebrand and Koehn) 370
1943 western Canadian (Anderson, Neatby, and Levi) 283
preharvest prediction correlation (Anderson, Neatby, and Levi) ... 283
Quality
effect of
frequent rains and storms (Swanson) 126
scab (Merritt and Ausemus) 199
soil fertility (Worzella) 107
evaluation with mixograms (Lamb) 57
—— (Morris, Bode, and Heizer) ... 49
Riboflavin in, rapid fluorometric method (Hoffer, Alcock, and Geddes) 524
Soft
effect of varieties on
mixograms (Morris, Bode, and Heizer) 49
sifted meal mixograms (Lamb) .. 57
Starch, see Starch, Wheat
Stored, for starch production (MacMasters and Hilbert) 258
Varieties, effect on malted wheat flour quality (Meredith, Eva, and Anderson) 233
Wheat-bug damage to (Kretovich) ... 1

Zein, Fractionation (Gortner and MacDonald) 324
Zeleny protein determination, Relation to Kjeldahl method and loaf volume (Eva and Anderson) 560
Zwieback, Thiamine loss during production (Meckel and Anderson) 280
